About

The **Bike Instructor Certification Program** offers professional training and certification for individuals who lead group rides or teach mountain bike skills clinics. The BICP is building on proven, successful methods nearly two decades in development.

Mission

Our mission is to advance the global standard for mountain bike instruction, driving an inclusive community that empowers our members through education, certification, service, and experience.

Vision

The goal of the BICP is to break down the barrier to entry to mountain biking by increasing access to professionally trained and certified instructors, with aims to establish a global standard for mountain bike skills instructor training.
